

Since 1983, the Food and Drug Administration has upheld a lifetime ban on blood donations from men who have sex with men. Despite requests by the American Association of Blood Banks, America's Blood Centers (which includes Mississippi Valley Regional Blood Center), and the American Red Cross to reexamine the policy and shorten the deferral period, the FDA has not adjusted the ban. **Use this postcard to tell the FDA how you feel about the ban, and donate blood if you can.**
